

## ECO FRIENDLY HOTEL THE NETHERLANDS

Providing on-going management support to the owners and team of two already existing eco-friendly hotels, extending their portfolio with two new locations in Amsterdam.

In six months time the team is growing from 30 to 120 employees. This requires careful adjustments in strategy, processes, development and implementation of HR policies.

With workplace wellbeing as the new mindset of the modern worker we build and guide the team in this stormy period of pre-opening to a new human resource structure and help in the development of recruitment campaigns and in-house training programs.
