

CHINESE MEDICINE TRAINING CLINIC

THE NETHERLANDS

For Holland's first college – training professional health care providers in all aspects of East Asian medicine – we established and operated an out-patient training clinic to treat patients with any type of illness, in order to provide Chinese medical treatments by doctors trained in Chinese and Western medicine.

The clinic offered acupuncture-, Tuina-, Gu Sha- and Chinese herbal medicine students a unique opportunity to improve their diagnostic and clinical skills under the guidance of highly skilled and experienced Chinese medicine practitioners.
