

# HEALTH & WELLNESS RESORT THE NETHERLANDS

Development of the first integrative and multidisciplinary Health & Wellness Resort in the Netherlands from the initial concept to a well respected business.

The resort synergistically brought together a spa, preventive medical centre, health club and health food bar. By including a preventive health clinic, the centre was unique in the sense that it went beyond traditional resorts by offering diagnostics and customized individually tailored health maintenance programs.

In order to foster an atmosphere with a cultural ambience that celebrated all types of creative wellness activities, the centre regularly organized art exhibitions, music events and had a restaurant. The centre also hosted conferences and business meetings.
