

INTEGRATIVE MEDICAL CENTER THE NETHERLANDS

Integrative medical center combining the cutting edge of modern medicine with the safe and gentle quality of natural medicine traditions from the East and the West.

Our primary purpose was to create a concept to provide comprehensive medical and wellness care.

The clinical team of western trained physicians (general physician, cardiologist and internist), physical and manual therapists, Asian medical practitioners, mind-body professionals, and dietitians used a patient-centered, multi-disciplinary approach to achieve an enhanced state of health and wellness for their clients.

Offering diagnostics and individually tailored health and lifestyle programs, patients also had access to individual services including: acupuncture, herbal medicine, Shiatsu, physical therapy, manual therapy, craniosacral therapy, nutritional and dietary guidance, personal training and massages.
